Goal: artefact
{artefact} required or produced by {context} is sufficiently trustworthy
Context: patternContext
{process}
Goal:artefactAppro
{artefact} is appropriate for {context}
...
Goal: artefactProv
{artefact} has required assurance
Context: provenance
determined required integrity of artefact: {required artefact integrity}
Goal:evaluations
Evaluations of artefact demonstrate correctness of {artefact}
Goal:artefactDev
The development process of the artefact ensures the objective is met
Goal: evalConf
Set of evaluations performed provide sufficient confidence in {artefact}
...
Strategy:evaluations
Argument over each evaluation
Strategy: artefactDev
Argument over artefact development process
Context: activities
Lifecycle activities requiring consideration dtermined by {required artefact integrity}: {activities}
no. of {evaluations}
no. of {activities} in artefact development process
Goal: evaluation
{evaluation} demonstrates correctness of {artefact}
Goal: activityTrust_Module1
{activity} is sufficiently trustworthy
...
Context: criterion
Defined criterion: {criterion}
Goal: evalRes
{evaluation} result demonstrates defined criterion is met
Justification:rationale
{rationale}
Goal: evalAppropriate
{evaluation} result is appropriate for evaluating {artefact}
Context: artefactVersion
Artefact version: {version ID}
Context: artefactDate
Artefact date: {date}
...
