Goal: configurationPlane
The configuration plane ensures configuration and reconfiguration is in accord with the high level policy of the Adaptive MILS system.
Context: planeDefinition
The Adaptive MILS system model describes the plane and the {architecture} of the plane
Module: interface
Interaction between components and compositions of componets of the plane is as defined by the security architecture
interface
Goal: configIntrospection
The configuration plane provides configuration inspection capabilities
Goal: dynamicReconfig
The configuration plane provides dynamic reconfiguration capabilities
Context: MPCC
Adaptive MILS Platform Configuration Compiler (MPCC)
Goal: monitorSynth
The configuration plane generates configuration blueprints and low-level system configuration properties that can be monitored at runtime from high-level specifications of the bounds of safe and secure operation and permissible configurations
Module: configController
Configuration change controller component argument
Process
Module: reconfigPlanner
Platform reconfiguration planner component argument
Process
Evide...
Configuratio n blueprints
Goal: runtimeConfig
Primitives in the network nodes and switches dynamically change the configuration according to the information distributed to the network and switch safely between old and new configurations at run-time
Context:reconfigAgent
A reconfiguration agent that invokes the dynamic reconfiguration primitives of the separation kernel and the network after a reconfiguration plan is approved
Goal:monDisProtocol
Monitoring and Distribution protocol makes it possible to safely collect reconfiguration requests and to distribute new configurations to the network switches and nodes.
Goal: configChange
The configuration change agent invokes separation kernel and TTEthernet primitives for configuration changes
Goal: NSM
A Network Scheduling Master monitors and adapts the network when network configuration change is necessary
Context: resche...
A rescheduling agent recomputes processor schedules for a proposed new configuration
